analysis

Uber is a multinational transporation network company that operates a ride haling platfrom.

Uber is a transportation company with an app that allows passengers to hail a ride and drivers to charge fares and get paid.

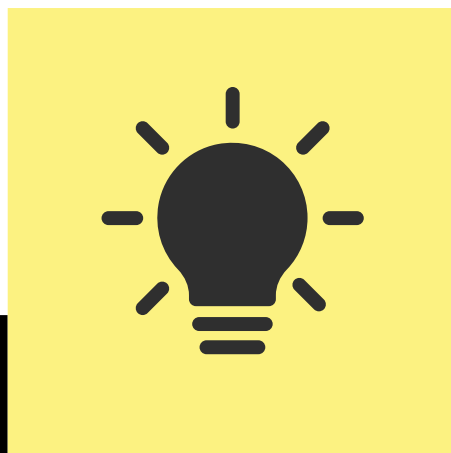

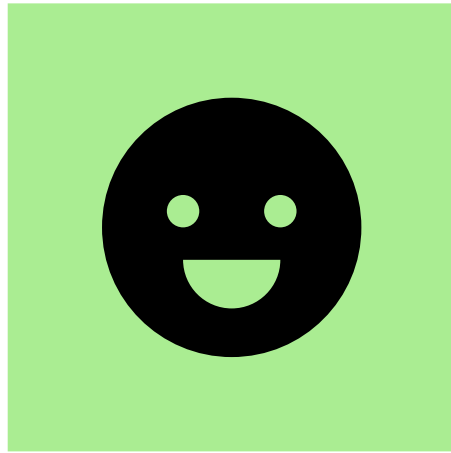

It was founded in 2009 by garrett camp and travis kalanick and is based in sanfrancisco,califorina.

Uber auto can accommodate parties of up 4 people, with one person in the front seat and 3 in the back.

uber trip prices are generally pretty resonable with a maximum fare of Rs.20 and about Rs.7 per kilometer.

Prices are sometimes subject to change especially over busy periods but you will be forewarned when you open the app.

Uber is a platfrom where those who drive and deliver can connect with rides,eaters and restaurants.

Using a ridesharing app like uber has several advantages over more traditional transporation methods.

Uber's app also let's users see a map that displays all the potential drivers in the area.

There have been legislative and court challenges to uber classifying it, drivers independent contractors rather than employes.

Once a driver has been chosen, the passengers can watch their drivers navigate to the pickup location to real time, with updates on estimated time at arrived this allows fir altimate convenience when coordinating a ride.

Perhaps the biggest hurdle is uber's failure to mandate that their drivers obtain the same license types as professional taxi drivers even though uber drives offer many of the same services as professionally licensed taxi drivers.

uber's fares are too low. most drivers are lossing moey but keep driving unit, they figure it out.
